## SYSTEM OF PLAY

The International Mixed Doubles Trophy Aarau will be played with 18 teams in a round robin format with 3 groups of 6 teams and playoffs with 8 teams. All games are 8 ends with an extra end if needed. In case of a blank in the extra end, the team without the hammer in that end automatically wins the game. Only the final is played with as many extra ends as needed to decide the winner. Teams ranked 1st and 2nd in their groups after the round robin are automatically qualified for the Quarter finals. The two best 3rd ranked teams after the Round Robin (according to DSC ranking) are also qualified for the Quarter finals. Quarter-final losers are all ranked 5th with equal amount of prize money. All games will be played according to the WCF rules valid at the time of the tournament. There is no time limit. **Please note:** Playoff rinks may be changed depending on outcome of Round Robin. **Please don't delay your games; the game supervision will intervene in case of slow play.**

## CHOICE OF STONE PLACEMENT

All round robin games are followed by Last Stone Draws according to the WCF rules (first rock clockwise, second rock counter-clockwise). Prior to the first game, there will be a coin-flip to determine which team has the choice of stone placement in the first. For the second and all the other round robin games the team with the better LSD from the last game has the choice in the first end. The team without "first end choice" has the choice of stone colour. Stones on the Button will be scored 0.0cm! (no two point measurement, if tied = coin toss). Throughout all playoff games the higher ranked team in their respective group will have first choice for either stone placement in the first end or stone colour. In case of equally ranked teams facing off, the team with the better DSC will have the first choice.

## RANKING

At the end of the round robin the ranking for each group will be drawn by following criteria: 1. Win / Loss record 2. Head to head result(s) 3. DSC (The single least favourable result is automatically eliminated when calculating the average distance.)
